

## EPA Type II Training & Certification Exam

### Training Includes Core and Type II Review Session and EPA Exam.

(For best results, download and study the Preparatory Manual and Challenge the Online Quizzes)

#### Four-Hour Session: 2 Hour Review—2 Hour EPA Exam

**The 2 hour review session will cover Core and Type II material only.** The EPA Type II certification continues to be the most popular type of certification for residential and light commercial air conditioning installers and service technicians. Participants desiring more than Type II certification are encouraged to prepare on their own using the available preparatory manual.

The EPA Section 608 exam has 100 questions, 25 in each of four sections; Core, Type I, Type II, and Type III. To achieve any type of certification, a technician must successfully pass the Core section plus a Type section. A technician that has passed all four sections of the exam will hold a Universal certification which covers all three types of equipment. The EPA exam is closed-book with no notes, smart phone or other type of electronic device allowed other than a calculator. The test proctor will provide scratch paper, #2 pencils and PT charts for use during the exam. Cost of the review session is \$50 and the cost to take the exam is an additional \$50. Combined cost is \$100. Exam only if desired. Photo ID required.

#### Download and Study the Preparatory Manual

Download the Section 608 Preparatory Manual from the links below . Read and study the material carefully **before** coming to the review session. Participants are also encouraged to challenge online practice quizzes to help build confidence. Note: Passing practice quizzes will not guarantee a passing score on the EPA exam. The EPA Exams are offered in either English or Spanish. Results are received by mail within 10 days or can be found a few days earlier at [www.escogroup.org](http://www.escogroup.org).
